IMED: 04/2003(Revised)

BANGLADESH WATER DEVELOPMENT BOARD

PROJECT COMPLETION REPORT

IMED FORM NO.: 04/2003 (Revised)

NAME OF PROJECT: Bank protection Work of the Meghna River from Borikandi to MP Bundh in Nabinagar Upazila in Brahmanbaria District(1stRevised).

DIVISION : BRAHMANBARIA W.D. DIVISION, BWDB, BRAHMANBARIA

CIRCLE : CUMILLA O&M CIRCLE, BWDB, CUMILLA

ZONE : EASTERN ZONE, BWDB, CUMILLA.

Government of the People's Republic of Bangladesh Ministry of Planning Implementation Monitoring and Evaluation Division

PROJECT COMPLETION REPORT: IMED 04/2003(Revised)

A. PROJECT DESCRIPTION:

01. Name of the Project

Bank protection Work of the Meghna River from Borikandi to MP Bundh

in Nabinagar Upazila in Brahmanbaria District (1stRevised).

02. Administrative Ministry/Division

Ministry of Water Resources (MOWR)

03. Executing Agency

Bangladesh Water Development Board (BWDB)

04. Location of the Project

Upazila- Nabinagar, District- Brahmanbaria.

05. Objective of the Project

1) To permanently protect the houses, roads, public and private schools, mosques, madrasas, temples, hat bazars, cultivable lands, paved roads, bridges etc. of the left bank of Meghna River from Borikandi to Dharabhanga will be permanently protected from the waves of Meghna river.

- 2) To protect aman and robi crops from water waves.
- 3) To Protect natural and human resources and reducing the risk of agricultural products;
- 4) To create employment opportunities in various fields.
- 5) To improve the quality of life through development in agriculture and non-agricultural sectors and protecting the property worth about 32515 lakh taka.

06. Estimated Cost

G. DESCRIPTIVE REPORT

1. General Observations/Remarks of the Project on:

1.1 Background

The streams of Surma and Kushiara rivers of Sylhet district meet in Ajmiriganjupazila of Habiganj district and flow as Kalni river. This combined flow is flowing further downstream from a place called Ashtagram in Kishoreganj district under the name of Meghna. Meghna is one of the largest rivers in Bangladesh. Almost all the water in the Meghalaya and Assam is discharged through the Meghna River. Every year due to the strong currents and waves during the monsoons, massive landslides occurs in the area adjacent to Dharabhanga from Borikandi in Nabinagar upazila. As a result of the erosion, the habitants of the area has lost valuable cropland, primary school, high school, Mosque, Hat-bazaar, shop,tower of mobile phone,houses etc. to the riverbed and caused the erosion. Many families in the 5 villages of Dharabhanga, Muktarampur, Nurjahanpur, Sonabalua and Borikandi have become destitute due to the river erosion. Therefore, implementation of bank Prptection work on the left bank of Meghna River from Borikandi to Dharabhanga MP bundh at a place called Dharabanga under Nabinagar Upazila is imperative. As a result, about 20,000 people of 5 villages in the area will be directly benefited. For that purpose a technical committee had been constituted to prepare a pre-feasibility technical report for the purpose of determining the technical feasibility of taking up protection Work projects and preparing the DPP. The project was approved by ECNEC on 20-08-2019 at a cost of Rs.7109.05 lakh Taka.

1.2 Justification/Adequacy

The project is located at Borikandi to MP Bundh in NabinagarUpazila in Brahmanbaria District. The main component of the project is construction of Protective work. After implementation of the project, the farmers of that area can save

their crops from unexpected erosion of wave action of Meghna River. The project will help the beneficiaries of that area to increase the food production. It will save the public & private properties of municipal area. It will also mitigate river erosion. It will Improve safety of immovable properties and socio economic condition of local people. Primary school, high school, Mosque, Hat-bazaar, shop, tower of mobile phone, houses, agricultural land & home stead will also be protected from the tidal waves.

1.3 Objectives

The objectives of the project are:

- To permanently protect the houses, roads, public and private schools, mosques, madrasas, temples, hat bazars, cultivable lands, paved roads, bridges etc. of the left bank of Meghna River from Borikandi to Dharabhanga will be permanently protected from the waves of Meghna river
- To protect aman and robi crops from water waves.
- To Protect natural and human resources and reducing the risk of agricultural products;
- To create employment opportunities in various fields.
- To improve the quality of life through development in agriculture and non-agricultural sectors and protecting the property worth about 32515 lakh taka. To create employment opportunities in various fields by increasing agricultural productio

1.4 Project revision with reasons

The project was approved by ECNEC on 20-08-2019 at a cost of Tk.7109.05 lakhs, total 2.700 km in 4 packages of main physical works. Protection work was fixed at a cost of Tk.6936.55 lakhs and construction of 4 ghatlas at a cost of Tk5 lakhs. There was 4 main Packages out of 5 Packages. They are CW-01, CW-02, CW-03, CW-04 and CW-05. In the early stage, the procurement of CW-01, CW-02 and CW-03 was done by the rate schedule of 2016-17. After that the procurement was completed 0.11% of lower rate from original estimate of CW-01,0.11% of lower rate from original estimate of CW-02,4.98% of higher rate from original estimate of CW-03. The combined contract price was Tk 4933.90 lakhs. As a result, the contract value of the first 3 packages of protection works stands at Tk 4933.90 lakhs. The approved DPP specifies the strength of CC block as 9:00N/mm^2. But the Taskforce of the Board directed to use CC block of 12.00N/mm^2. and 100% Polypropylene Geo Bag, Which was not Mentioned in the approved DPP. This implementation at the field level was complicated. The decision was to use 100% Polypropylene bags for the remaining bags & Manufacturing of CC block of 12.00N/mm^2. In view of this, the estimated cost of the previously contracted 3 packages (CW-01, CW-02, CW-03) increased to TK.6065.99 lakhs from the earlier estimate of TK.4933.90 lakhs and package no.CW-04 increased to TK 8.00 lakhs from TK 5 lakhs. Moreover, A Feasibility committee was formed by the board on 06-04-2021 and with respect to the report of Feasibility committee, the length was reduced to 2.165 km from 2.700 km. Consequently, the estimate of Package No. CW-05 was reduced to TK.953.64 lakhs from TK 2125.90 lakhs. As a result, the design of the Protection work has been modified. As per the revised design and new schedule (for the year 2019-20) the expenditure on items related to manufacture and supply of CC Blocks (Item Code- 40-190) and supply of Geo Bags (Item Code- 40-320) increased. Due to this, DPP has been Revised. On 22/02/2022 the RDPP estimated Tk. 7211.13 was approved.

2. Rationale of the project in respect of concept, Design, Location and Timing.

Every year due to the strong currents and waves during the monsoons, massive landslides occurs in the area adjacent to Dharabhanga from Borikandi in Nabinagarupazila. As a result of the erosion, the habitants of the area have lost valuable cropland, primary school, high school, Mosque, Hat-bazaar, shop,tower of mobile phone,houses etc. to the riverbed.Many

A

families in the 5 villages of Dharabhanga, Muktarampur, Nurjahanpur, Sonabalua and Borikandi have become destitute due to the river erosion.

The nature and objective of the project have direct relevance of the national objectives of attaining self- reliance in food grain production, generation of rural development, poverty alleviation especially for rural poorer section, creation social & environmental balanceand building economic infrastructures for the future generations to sustain. The Design was done by Design circle-04. The location, concept and the timing was selected by the technical committee formed on 10-12-2015 and with respect to the report of technical committee the DPP was prepared and the project was approved.

3. Brief description on planning and financing of the project and its applicability.

♦ Project Identification:

As per DO Letter of respective Member of the parliament of the people's republic of Bangladesh, the project area on the remaining length of Dharabhanga, Muktarampur, Nurjahanpur, Sonabalua and Borikandi villages was destroyed by the waves of the water body. The problems were identified by BWDB and to solve these problems through protective work project was taken. A technical committee which was formed by BWDB were recommended the preparation and implementation of the project.

Project Preparation:

Addressing the above problems, Brahmanbaria W.D Division, BWDB Brahmanbaria prepared the project proposalconsisting Construction of protection work and Slope Protection at Borikandi to MP Bundh in NabinagarUpazila in BrahmanbariaDistrict.

♦ Appraisal:

PEC meeting was held on 20/12/2017 in Planning Commission and decision was taken that the cost of construction and protection work provided in the DPP of the project should be formulated as per the latest rate schedule.

- ♦ Credit Negotiation: Not applicable
- ♦ Credit Agreement: Not applicable
- ♦ Credit Effectiveness: Not applicable
- ♦ Loan Disbursement: Not applicable
- ♦ Loan Conditionality: Not applicable
- Project Approval: The project was approved on October, 2019& subsequent revision was approvedon
 February, 2022.
- ♦ Others (if any): Nil

4. Analysis of the Post-Implementation situation and result of the project:

4.1 Whether the beneficiaries of the project have clear knowledge about the Target/ Objectives of the project: Yes.

4.2 Programme for use of created-facilities of the project:

The stakeholders are directly taking advantages of the created facilities of the project.

4.3 O & M programme of the project:

Post Project recurrent O&M works will be arranged from the regular O&M allocation.

4.4 Impact of the Project -

4.4.1 **Direct:**

- 1) If the protection work is done, the houses, roads, public and private schools, mosques, madrasas, temples, hat bazars, cultivable lands, paved roads, bridges etc. of the left bank of Meghna River from Borikandi to Dharabhanga will be permanently protected from the waves of Meghna river.
- 2) Protecting aman and robi crops from water waves.
- 3) Protecting natural and human resources and reducing the risk of agricultural products;
- 4) To create employment opportunities in various fields.
- 5) Improving the quality of life through development in agriculture and non-agricultural sectors and protecting the property worth about 32515 lakh taka.

4.4.2 Indirect:

- Sustainable socio-economic enhancement.
- Enhancement of local employment.
- Enhancement of echo system and biodiversity.

4.5 Transfer of Technology and Institutional Building through the project:

Not Applicable

4.6 Employment generation through the project:

A large number of Skilled/Unskilled worker were Employed during Construction period .

4.7 Possibility of Self-employment:

There are possibilities of self-employment as existing commercial and business centerswill be established.

4.8 Possibility of women-employment opportunity:

Most People of the project area are with limited source of employment. As such poverty is the part and parcel of their day-to-day life. By the implementation of this project, employment in business sector will be created due to socio-economic condition, micro-financing activities. Project will also create employment opportunities and these will ultimately contribute to poverty alleviation. Women can engage themselves to various household & handicraft and business employment opportunities after Development of the project area by this project.

4.9 Women's participation in development:

Women have participated with men during construction phase of the project

4.10 Probable Impact on Socio-Economic activity:

At post project condition, due to the protection work of the river, River Bank erosion has been eliminated in the project area, Additional crops are being produced. By protecting the river bank erosion, various infrastructures are saved from the erosion. As a result, socio-economic balance in the locality is enhanced.

4.11 Impact on environment:

Environmental enhancement is achieved through the implementation of the Project. Flood and water logging related disease reduced.

4.12 Sustainability of the project:

The project is sustainable but requires periodic maintenance.

4.13 Contribution to poverty alleviation/reduction:

The project fulfilled the following benefits in compatible strategic goal i.e.,

a) Reduction of vulnerability to water related disaster,

- b) Manage erosion of river and protect both bank infrastructure of poverty alleviation as per SDG:
- c) The project ensures to save movable and immovable properties of total worth of approximately Tk. 32515 lakh.
- d) It generated employment for skilled/unskilled during construction period and also in annual O&M phase in project performance. Also better employment access in business tertiary sectors is enhanced.
- e) Natural security against river bank erosion is resorted.

4.14 Opinion of the public representatives, local elite, local administration, teachers, religious leaders, women's representatives etc.

Positive remarks regarding the project.

4.15 Contribution of Micro-credit programmes and Comments on overlapping with any NGO activities.

Not Applicable

5. Problems encountered during Implementation (with duration & steps taken to remove those)

5.1	Project Management	N/A
5.2	Project Director	N/A
5.3	Land Acquisition	N/A
5.4	Procurement	N/A
5.5	Consultancy	N/A
5.6	Contractor	N/A
5.7	Manpower	N/A
5.8	Law & Order	N/A
5.9	Natural calamity	N/A
5.10	Project financing, allocation and release	N/A

5.11 Design formulation/approval

The approved DPP specifies the strength of CC block as 9.00N/mm^2. But the Taskforce of the Board has directed to use CC block of 12.00N/mm^2. Also, as 100% Polypropylene is not mentioned in the item specification of Geo Bag in the approved DPP. This implementation at the field level is complicated. The decision was to use 100% Polypropylene bags for the remaining bags & CC block of 12.00N/mm^2.

5.12	Project aid disbursement and re-	N/A
	imbursement	
5.13	Mission of the development partners	N/A

5.14 Time & Cost Over-run

- Time over run, due to covid-19 situation.
- Cost overrun, due to the minute of 2nd steering committee meeting. In this

p of

meeting, the decision of using 100% PP bag and manufacturing of CC blocks strengthening 12.00N/mm² was taken. For this cost of the project was increased.

5.15	Project Supervision/Inspection	N/A
5.16	Delay in Decision	N/A
5.17	Transport	·N/A
5.18	Training	N/A
5.19	Approval	N/A
5.20	Others	

- Due to unavailability of filling materials
- Due to thepandemic situation caused by covid-19.

6. Remarks & Recommendations of the Project Director:

The project was approved by ECNEC on 20-08-2019 at a cost of Taka 7109.05 lakhs, total 2.700 km in 4 packages of main physical works. There were 5 Packages. They are CW-01, CW-02, CW-03, CW-04 and CW-05. After that RDPP was prepared because of time and cost overrun. On 22/02/2022 the RDPP estimated 7211.13 was approved.

During the implementation of this project, members of different committees & monitoring authorities visited project site and provided their opinions which has helped to implement the project. Project was implemented properly following respective design, drawing and specification. The quantity and quality of C.C blocks, Sand filled geo-bags etc. were ensured by Task force committee of BWDB and concerned officials of BWDB. In the whole, BWDB task force has monitored all the works to ensure transparency.

During implementation, problems related to filling material was faced. Also, there were lots of obstacles needed to overcome during geo-bag dumping work. Finally, all the works were completed maintaining desired quality. Now, the people of the project area are getting all the benefits of this project. Thus, the project area is now free from Bank erosion.

Finally, the over all progress of the project is 93.39%. The project has been completed successfully and beneficiaries are getting full benefit from the project. Proper monitoring and regular maintenance works are required for more sustainability of the project.
