08. Objective of the Project:

Overall objective: The objective of the project is to protect the army installations and infrastructure being constructed by the Bangladesh army and the property of the common public in the surrounding areas from the effects of river erosion.

Specific Objectives (in bullets):

- > Land elevation of the army installation.
- Protection of the army installation from the shock wave of haor.
- > Protection of Military and Civilian infrastructures from river erosion.
- Increase navigability and extraction capacity of river by dredging.
- Improving the environment by plantation of trees.
- To create income and employment opportunities for both men and women who are landless, poor and vulnerable during infrastructure construction. So that good environment is maintained in the project area.
- Improvement of the socio-economic condition of local people.

09. Background of the Project (In brief): The project is located in Mithamain Upazilla under Kishoregonj district. The area is a flat area of the flooded Haor region. The entire area remains submerged under water in rainy season. The naval protocol route to the border of the neighboring country coordinates with this area. Bangladesh army has taken up a plan to set up an army installation in this area; which will undoubtedly contribute to the free trading of this area with the neighboring country by ensuring security of the naval protocol route. The area is now in an unprotected condition due to the strong tide of the Ghorautra river of Mithamain Upazilla. Because of the strong tide of the Ghorautra River the area is in danger of river erosion. The river erosion will affect the socio-economic condition of the area. Moreover, most of the land will be submerged under water within two years if river bank and wave protection works are not undertaken immediately.

10. Major Activities:

- a. Bank protective work- 2.63 km
- b. Peripheral dyke with soft protection- 3.98 km
- c. Wave protection work- 3,98 km
- d. Earth filling & leveling- 275.65 acres
- e. Peripheral lighting- 3.98 km
- f. 03 Storied Building for BWDB- 01 Nos
- g. Troops Barrack for Bangladesh Army
- h. RCC Ghat- 02 Nos

11. Reasons for Revision (if applicable):

• 1st Revision: Project work has been implemented through "Delegated Procurement" as per Rule-12 of PPR-2008 (project work started after 14 months of scheduled time). The major challenges are the Re-alignment of the overall project area, Rates of schedule change, Land acquisition for construction of BWDB building & Additional 780m bank protective work. Overall covid-19 situation and economic condition also played role for time-over run.

11.1 Reasons for No-Cost Time Extension (if applicable):

- 1st time No-Cost Time Extension: The project area is a flat area of the flooded haor region. The entire area remains submerged under water in rainy season. Therefore, the progress of work was slowed down during monsoon & flood. Also, delay of land acquisition for construction of BWDB building
- 2nd time No-Cost Time Extension: 1st Revised DPP has been included of new items Peripheral lighting- 3.98 km, additional 780m bank protective work and additional work of army troops barrack.

12. Financing Arrangement (Source-wise):

12.1 Status of Loan/Grant:

G. POST-PROJECT REMARKS

31. General Observations/Remarks on the Project:

31.1 Background: The project is located in Mithamain Upazilla under Kishoregonj district. The area is a flat area of the flooded Haor region. The entire area remains submerged under water in rainy season. The naval protocol route to the border of the neighboring country coordinates with this area. Bangladesh army has taken up a plan to set up an army installation in this area; which will undoubtedly contribute to the free trading of this area with the neighboring country by ensuring security of the naval protocol route. The area is now in an unprotected condition due to the strong tide of the Ghorautra river of Mithamain Upazilla. Because of the strong tide of the Ghorautra River the area is in danger of river erosion. The river erosion will affect the socio-economic condition of the area. Moreover, most of the land will be submerged under water within two years if river bank and wave protection works are not undertaken immediately.

31.2 Justification/Adequacy: Project is justified.

31.3 Objectives:

- Land elevation/development of the army installation.
- Protection of the army installation from the shock wave of haor.
- Protection of Military and Civilian infrastructures from river erosion.
- Increase navigability and extraction capacity of river by dredging.
- Improving the environment by plantation of trees.
- To create income and employment opportunities for both men and women who are landless, poor and vulnerable during infrastructure construction. So that good environment is maintained in the project area.
- Improvement of Socio-economic condition of local people

31.4 Project revision with reasons:

Re-alignment of overall project area, schedule of rate change, land acquisition cost increase & additional 780m bank protective work.

31.5 Rationale of the project in Concept, design, location and timing:

The execution of the project is important considering the following reasons:

- A. Wave and bank protection works along with land development of the Mithamain area adjacent to Ghorautra River is required for the safe and secured construction of Mithamain Army Installation.
- B. A means of living and job opportunities for the local people of the area is highly required to upgrade the status of the socio-economic condition.
- C. Improvement of the hydrologic condition of the area is needed due to the current unstable state of the area affected by the strong wave of Ghorautra River.

32. Brief description on planning and financing of the project and its applicability (Consider the following issues):

- Project Identification: The project is located in Mithamain Upazilla whose entire area remains-submerged-under-water-in-the-rainy-season. The-naval-protocol-route-to-the-border-of-the neighboring country coordinates with this area. Bangladesh army has taken up a plan to set up an army installation in this area; which will undoubtedly contribute to the free trading of this area with the neighboring country by ensuring security of the naval protocol route.
- 32.2 Project Preparation: Bangladesh Water Development Board
- 32.3 Appraisal: Bangladesh Water Development Board
- 32.4 Credit Negotiation: NA
- 32.5 Credit Agreement: NA
- 32.6 Credit Effectiveness: NA
- 32.7 Loan Disbursement: NA
- 32.8 Loan Conditions: NA
- 32.9 **Project Approval:** The Project was approved by ECNEC on 09 October 2018 and 1st Revised DPP (RDPP) was approved by planning minister on 13 February 2023.
- 32.10 Others (specify): Nil

33. Analysis of the post-implementation situation and result of the project (Consider following issues):

- Whether the beneficiaries of the project have clear knowledge about the Target/ Objectives of the project. Yes
- 33.2 Programme for use of created facilities of the project: BD Army and adjacent local people.
- 33.3 O & M programme of the project: After completion of the project major repair/rehabilitation works will be accomplished from regular O&M budget of BWDB.
- 33.4 Impact of the project -
 - 33.4.1 **Direct:** Land development, wave and river bank protection work will protect the Mithamain area from flood and erosion. This will also facilitate the local people as well as the army installation planning from land crisis.
 - 33.4.2 **Indirect:** The poor and unprivileged people of Mithamain area will be benefited with job opportunities which will upgrade the socio-economic state of that area in near future.
- 33.5 Transfer of Technology and Institutional Building through the project: NA
- 33.6 Employment generation through the project: A large number of skilled/unskilled workers were employed during construction period. Local workers and suppliers were closely involved in construction works.
- 33.7 Possibility of Self-employment: NA
- 33.8 Possibility of women-employment opportunity: Significant

	33.9	Women's participation in development: Sign	inicant

	34.19	Others:	Work progress	delay due to Covid-19.

Women's participation in development: Significant

33.9

35. Remarks & Recommendations of the Project Director:

The project is located in Mithamain Upazilla whose entire area remains submerged under water in the rainy season. The naval protocol route to the border of the neighboring country coordinates with this area. Bangladesh army has taken up a plan to set up an army installation in this area; which will undoubtedly contribute to the free trading of this area with the neighboring country by ensuring security of the naval protocol route.

The project has been implemented within the item-wise quantity and cost of the approved DPP/RDPP. The physical works of the project is completed as per the approved design, drawing and technical specifications provided by BWDB. To attain better sustainability of the completed work, a sufficient revenue budget should be allocated in each financial year for its routine and periodic maintenance especially during and after the flood (if any).

Date	Signature and seal of the Project Directors

36. Remarks/Comments of Agency Head:

The main objective of this project was land development and protection of army installations and civilian infrastructures in the area of Mithamain Upazilla of Kishoreganj district from flooding and river bank erosion. The project was delegated to the 24 Engineer Construction Brigade, Bangladesh Army. The main activities of the project include river bank protection work, wave protection work, earth filling and leveling, peripheral dyke constructions, etc. These construction works successfully protect army installations and local public properties from the risk of flooding and river bank erosion. Thus, this project can be regarded as successful in serving its intended purpose.
